

JOHN CORREA

FRONTEND DEVELOPER

jecl2912@gmail.com +57 305 379 2387 Portfolio LinkedIn GitHub

PROFILE

Frontend developer with 4+ years of experience building interfaces for e-commerce platforms. Specialized in React, TypeScript, and VTEX (IO and Legacy), with a focus on performance, usability, and technical SEO. I've worked on both custom-built solutions and integrations on existing platforms, collaborating directly with product teams and clients. A continuous, self-driven learner interested in sharing knowledge and growing within demanding technical teams.

EXPERIENCE

Frontend Developer

January 2025 - June 2026

Infracommerce

- Developed and maintained custom components on VTEX IO for live e-commerce stores.
- Built reusable components combining native platform blocks.
- Optimized performance, technical SEO, and usability on active production sites.

Frontend Developer

May 2021 - January 2025

Blacksip

- Developed on VTEX Legacy and IO across B2B and B2C projects.
- Created custom templates and components from scratch.
- Integrated native VTEX components to speed up delivery times.
- Built landing pages and collaborated directly with clients to improve user experience.

EDUCATION

Software Analysis and Development (ADSI) - SENA

2021

Final project: online store for a furniture company.

Technical High School Diploma in Software Programming - Antonio Derka Sto. Domingo

2018

Final project: student and grade management system.
